

Team Swix,

We're about halfway through the season, and let's be honest: Conditions across the globe have been pretty tough on skis this year. The lack of snow, and multiple thaw and freeze cycles has taken its toll on your edges. By this point, your tools are likely showing some wear too. File guides wear down with use and can lose precision. Diamonds wear down and don't work as well as they used to. Files lose their sharpness and can't cut as well as when they are new. All of this adds up to extra time and work for you in the tuning room after a long day on the hill. Now is the time to check your files, guides, and diamonds for excessive wear or reduced performance and replace anything that is tired or worn. As a valued Swix customer, we're offering an extra 10% discount on top of your existing discount on files, guides, and diamonds. Save yourself time and work as well as ensure proper maintenance for peak performance, replace these important Swix tools now with this extra savings.

Enter code: **TUNE10** at checkout for the extra 10% off you already in place discount
